## Musicians Receive Special Instructions on Their Instruments

Brother Romuald, President of the Mississippi Coast Music Directors Association, reports the following on the first of a series of one-day Sectional Instrumental Clinics which are sponsored by the above Association.

On Saturday, Dec. 7, Mr. G. F. (Pat) Rooney was host to about forty trumpet, cornet, trombone and baritone students from the Coast school bands. These students came together to receive special instructions on their instruments. Mr. Rooney took over the cornet and trumpet class and Mr. D. Mason of Gulf Hills, Ocean Springs, took over the class in trombone and baritone.

The purpose of these sectional clinics is to give students an opportunity to get some practical instructions from a teacher who majored on their instrument. It is true that every college graduate band director received sufficient training on all band instruments to be able to teach these successfully. But it is also true that no one person can master the technicalities of all the band instruments. Therefore, the students are placed in the band of a professional on a certain class of instruments for a one-day course. The students are free to ask questions and present their problems to the guest instructor who is well qualified to demonstrate on his instrument.

The directors present at last Saturday's clinic which was held at Bay High were J. Stanley Arnold of Gulfport, W. H. Goodwin of Pascagoula, "Pat" Rooney and Brother Romuald from the local schools.

## Altar Society News

It is regrettable to note the lack of interest displayed in the present drive for clothing for the war torn countries of Europe and the Far East. Our people say "the war is over, but our need for helping is not, and we should be only too willing to do so when we realize how we have been saved from the ravages of war in this country, and look at the plight of those over there.

Others say they have people right here to whom they can give their unneeded clothes. True there are needy here, but not in one half as much need as those across the ocean.

The date for collection has been extended here to next Monday, the 16th, so if you have only one piece that you can spare, do not be ashamed to give that—bring it and drop it in the box for that purpose at the Magnolia State Supply Co., 111 Main St. Remember "charity covers a multitude of sins," and who of those among us does not need such a cover?

What have Telephone  
Earnings Got To  
Do with Me?

To safeguard day and night the full usefulness of the telephone for you and your family, reasonable earnings are needed. No business can give adequate service without adequate earnings.

Telephone earnings have declined rapidly. They are not only the lowest in history, but they are dangerously low.

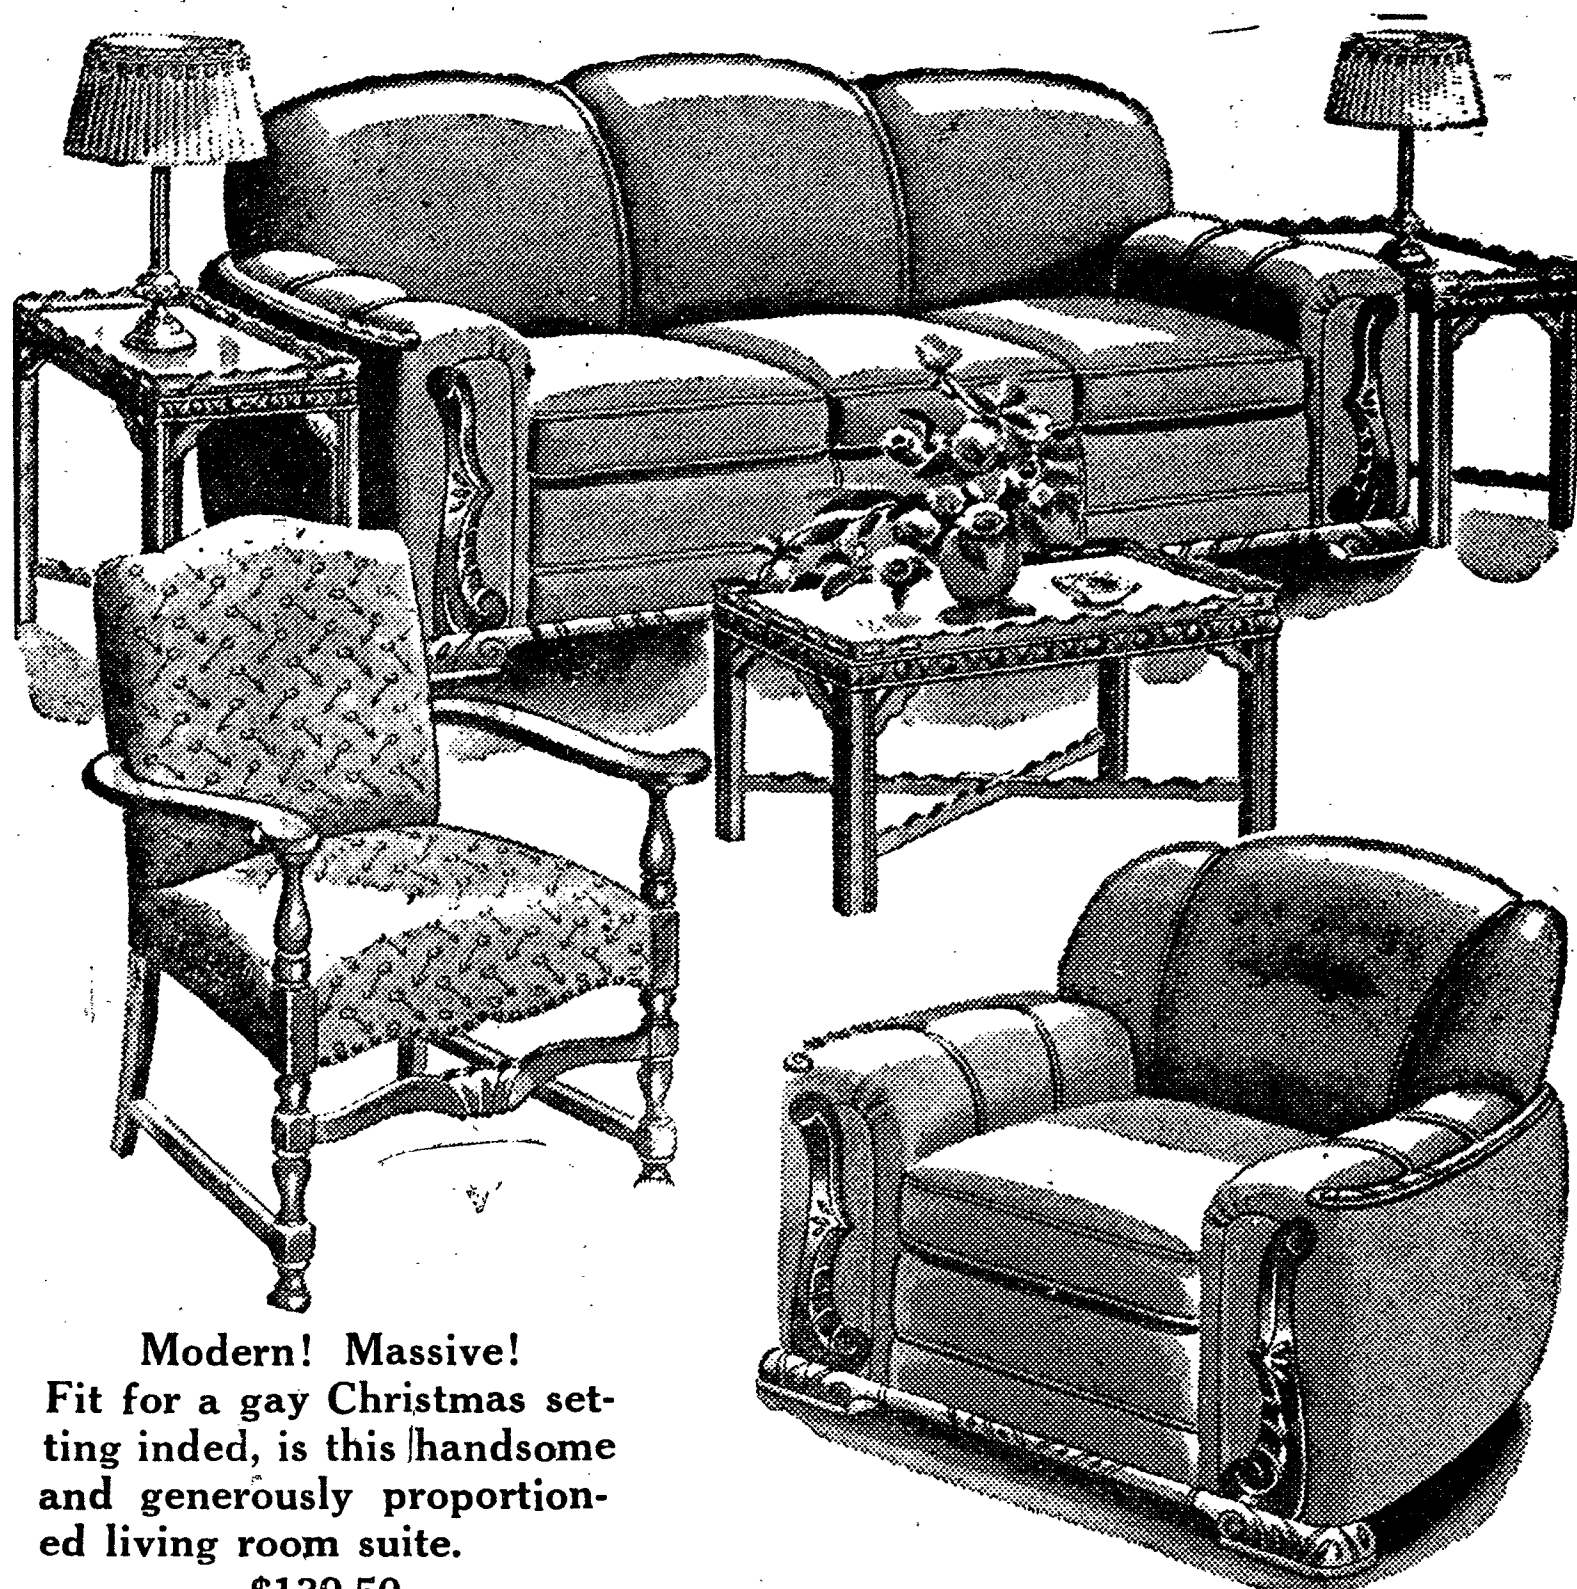

Telephone earnings are low because rates generally have remained the same for many years while the costs of providing telephone service have greatly increased. Wages, telephone materials, building costs, and services have been going up so fast that the amount of money paid out to provide telephone service is increasing faster than the amount taken in.

### HOME AGENTS NOTES

The holiday Season is near and it is time to think of the native evergreens that can be used to decorate one's own home, used as gifts or offered for sale.

In gathering Christmas greens, use a sharp knife or pruning shears for cutting the evergreens. This will help prevent decay and will stimulate new growth that may be used another year—but be careful and do not destroy trees and shrubs that grow along the highways and add beauty to the scenery.

Most evergreens and a wide variety of other plants are suitable for use in Christmas decorations. According to the U. S. Forest Service, it is possible to keep certain kinds of Christmas trees fragrant and green during the entire holiday season with the aid of a chemical solution. To make the solution, mix 5 grams of citric acid and 6 grams of malic acid in 3 quarts of water. Stand the tree in a wide-mouthed bottle or crock which holds about a gallon. Then add 15 grams of calcium carbonate to the acid solution, and pour the whole solution into the crock. As the tree uses up the so-

lution, add more water. These chemicals are not expensive. The solution will be helpful for most of the species of evergreens used for Christmas trees, excepting hemlock. The balsam fir will hold its needles in the house without any treatment, but spruce needles drop in a few days if the tree is not treated.

The tree should be treated as soon as possible after it is cut or purchased. To facilitate absorption of the liquid, a short section should be cut off the bark of the tree trunk so that fresh wood will be exposed. The tree should be placed in a cool place for several days while it is absorbing the solution.

### Tips on Preparing Native Christmas Decoration

1. Preparing Cones for burning at Christmas Time.

Use 2 tablespoons of powdered glue in gallon of water. Dip the pine burs and drain. Sprinkle the chemicals on them and let dry.

Chemicals—

Sroutum Chloride—Makes red flame

Barium Chloride — Makes green flames

Cooper Sulphate—(Blue Stone) make blue flames

Potassium Chloride—Makes Lavender flame

Sodium Chloride—(Table Salt)—

Steel dust, saved when tools are being filed, sprinkled on the burs makes them sparkle when burned.

2. To preserve magnolia leaves—

2 parts water

1 part glycerine

Method: Put stems, only in the mixture. Let stay two weeks. Take out, then they will last indefinitely.

3. To preserve autumn leaves—

Press with a warm iron. This preserves the color. The pressed leaves may be soaked in a solution of 1 part glycerine to 9 parts water. When thoroughly soaked, remove and press between blotters.

Such leaves remain flexible forever. They can be glued to branches at each point where one has been removed.

4. To prevent Holly from shedding: Spray holly twigs with a .01 per cent solution of naphthalene-acetic acid. The leaves will remain firm after the twigs are dead and dried out.

From where I sit... by Joe Marsh

Another Raid—  
Another Tragedy!

Had another raid last night in Lee County. Officers broke into a speakeasy, rounded up a group of youngsters who thought it smart to break the law, and battled one more ring selling bootleg liquor.

Of course, that's commonplace in Lee County—where bootleg joints and gangsterism have sprung up under local option.

But I can't help think how different it is in our town, with decent places like the Garden Tavern selling a moderate beverage like beer—open to inspection day and night.

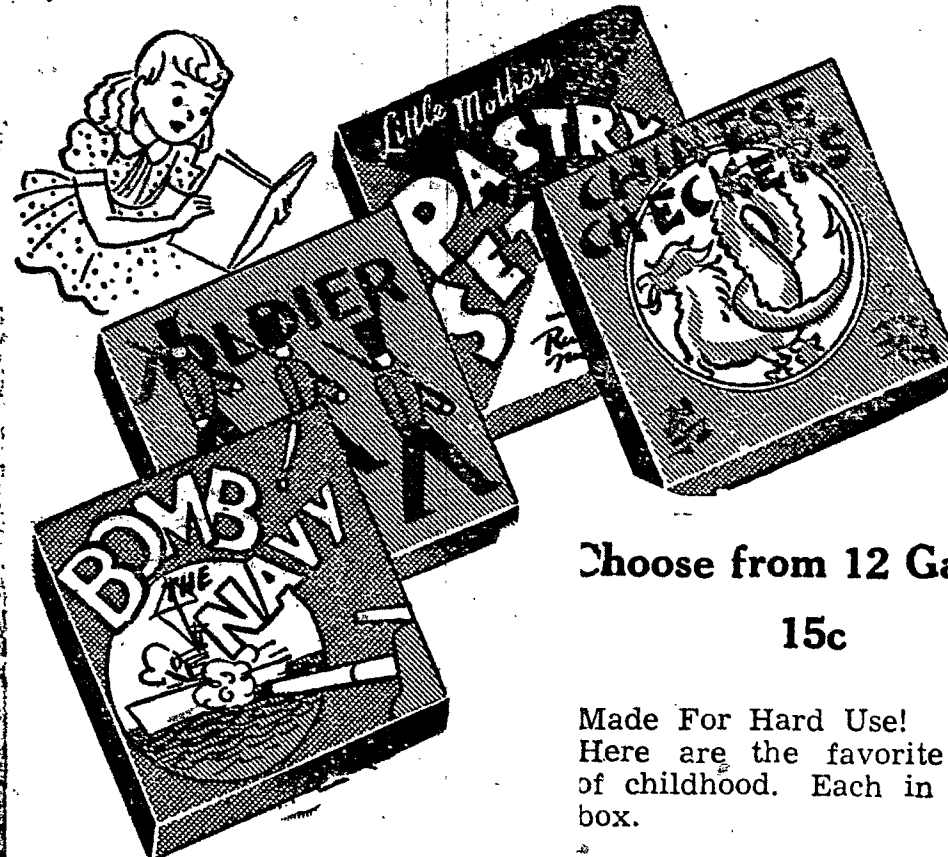

And with brewers and tavern keepers themselves policing conditions under the "Self-Regulation" program—by which a tavern either maintains decent, law-abiding standards—or is closed up!

From where I sit, you don't need a better argument for "Self-Regulation" vs. local option than those raids in Lee County—and the tragedy they bring families whose children are misled by bad example and disrespect for the law.
